Arrow has feather flight, wooden shaft and tanged arrowhead made of what looks like glass although it might be quartzite.

The two smallest are made of flint or cherty stone (not examined closely, box sealed) the others are of glass. All are tanged and one stone and 3 glass ones have a piece of shaft still attached.

H.440

a, b, c, are double barbed and have a spade-like butt. d has a single barb and a rounded butt.
