

# GEOGRAPHICAL VARIATIONS OF THE MINIMUM MORTALITY TEMPERATURE AT A GLOBAL SCALE: A MULTI-COUNTRY STUDY

## Supplementary Material

### Contents

#### Tables

eTable 1. Additional information on the MCC dataset.....	2
eTable 2. Distribution of the minimum mortality temperature (MMT, °C) by country.....	6
eTable 3. Distribution of the minimum mortality temperature percentile (MMTP, %) by country.....	8

#### Figures

eFigure 1. Geographical distribution of the 658 communities analyzed by Köppen's climate classification.....	10
eFigure 2. Overall cumulative exposure-response relationships and minimum mortality temperatures in 43 communities.....	11
eFigure 3. Pooled minimum mortality temperature (MMT, °C) by country.....	16
eFigure 4. Pooled minimum mortality temperature percentile (MMTP, %) by country...	17
eFigure 5. Scatter plots between minimum mortality temperature (MMT, °C) and geographical, climatic and socio-economic indicators.....	18

**eTable 1.** Additional information on the MCC dataset.

COUNTRY	COUNTRY	PERIOD	MORTALITY DATA	TEMPERATURE DATA
Argentina	3 cities	2005-2015	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the National Ministry of Health.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements from one meteorological station in each city provided by the National Weather Service.
Australia	3 cities	1988-2009	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the Australian Bureau of Statistics.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements from meteorological stations located within ≤30 km of each city provided by the Australian Bureau of Meteorology.
Brazil	18 cities	1997-2011	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99.) Provided by the Ministry of Health.	Mean daily temperature (in °C) computed from the 24-hour average of hourly measurements, from weather stations located within the urban area by the National Institute of Meteorology of Brazil.
Canada	25 census metropolitan areas (CMA) and 1 city (Hamilton)	1986-2015	All causes. Collected from the Canadian Mortality Database.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from the Environment Canada and collected from monitoring stations located closest to the CMA centre.
Chile	4 cities	2004-2014	All causes. Provided by the <i>Departamento de Estadísticas e Información de Salud, Ministerio de Salud</i> .	Mean daily temperature (in °C), computed as the 24-hour average based on hourly measurements provided by the <i>Sistema de Información Nacional de Calidad del Aire (SINCA), Ministerio del Medio Ambiente</i> .
China	15 cities	1996-2015	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the Municipal Center for Disease Control and Prevention in each city.	Mean daily temperature (in °C), computed as averaged hourly temperatures obtained from the China Meteorological Data Sharing Service System ( <a href="http://data.cma.cn/">http://data.cma.cn/</a> ).
Colombia	5 cities	1998-2013	All causes. Provided by the National Administrative Department of Statistics ( <i>DANE</i> ).	Mean daily temperature (in °C), computed as 24-hour average based on hourly measurements provided by the <i>Instituto de Hidrología, Meteorología y Estudios Ambientales de Colombia (IDEAM)</i> .
Costa Rica	1 city	2000-2017	All causes. Provided by the Instituto Nacional de Estadística y Censo. [Open Access]	Mean daily temperature (in °C) obtained from WMO-NOAA (Surface Data Hourly Global, DS3505).
Czech Republic	3 cities and 1 rural region	1994-2015	All causes. Provided by the Czech Statistical Office and the Institute of Health Information and Statistics.	Mean daily temperature (in °C) obtained from stations operated by the Czech Hydrometeorological Institute (measurements in standard climatic terms 7:00, 14:00 and 21:00 local time, and daily means).
Ecuador	2 cities	2014-2016	All causes. Provided by the <i>Instituto Nacional de Estadística y Censos</i> . [Open Access]	Mean daily temperature (in °C) obtained from WMO-NOAA (Surface Data Hourly Global, DS3505).
Estonia	4 cities and 1 region	1997-2015	All causes. Provided by the Estonian Causes of Death Registry.	Mean daily temperature (in °C) computed as the 24-hour average of hourly measurements collected from the Estonian Environment Agency.

COUNTRY	COUNTRY	PERIOD	MORTALITY DATA	TEMPERATURE DATA
Finland	1 metropolitan area	1994-2014	All causes. Provided by Statistics Finland.	Mean daily temperature (in °C) obtained from the Finnish Meteorological Institute. The weather stations around the country were interpolated onto a 10×10 km grid covering the whole of Finland, using a Kriging model.
France	18 cities	2000-2014	All causes. Provided by the French National Institute of Health and Medical Research (CepiDC).	Mean daily temperature (in °C) computed as the mean of the minimal and maximal temperature, obtained from the Meteo France. A single weather station was selected for each city.
Germany	12 cities	1993-2015	All causes. Provided by the Research Data Centres of the Federation and the Federal States of Germany ( <i>Forschungsdatenzentrum der Statistischen Ämter des Bundes und der Länder</i> ).	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from the Climate Data Centre of the German National Meteorological Service ( <i>Deutscher Wetterdienst</i> ).
Greece	1 city	2001-2010	All causes. Provided by the Hellenic Statistical Authority.	Mean daily temperature (in °C), computed as the 24-hour average based on hourly measurements collected from the National observatory of Athens ( <a href="http://www.noa.gr/">http://www.noa.gr/</a> ) from site "Thisio" located in the city of Athens.
Guatemala	1 city	2009-2016	All causes. Provided by the <i>Instituto Nacional de Estadística, Unidad de Estadística de Salud</i> .	Mean daily temperature (in °C), provided by the <i>Instituto Nacional de Sismología, Vulcanología, Meteorología y Hidrología</i> .
Island of Ireland	4 regions covering all Island population (ROI) and 2 in the Northern Ireland (NI)	1984-2007	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the Irish Central Statistics Office Northern and Ireland Social Research Agency.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements, obtained from two weather stations for each ROI regions and NI regions from Met Eireann, and the United Kingdom Meteorological Office.
Iran	1 city	2004-2013	All causes. Provided by the Ferdows organization of Mashhad Municipality.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements collected from Iran Meteorological Organization (IRIMO) ( <a href="http://www.irimo.ir/">http://www.irimo.ir/</a> ).
Italy	18 cities	2006-2015	All causes. Obtained from local mortality registries and from the rapid mortality surveillance system.	Mean daily temperature (in °C) computed as the 24-hour average based on 6-hour measurements obtained from the Meteorological Service of the Italian Air Force. A single weather station was selected for each city, using the airport monitoring station located closest to the city center.
Japan	47 prefectures	1985-2015	All causes. Provided by the Ministry of Health, Labour and Welfare.	Mean daily temperature (in °C) provided by the Japan Meteorology Agency from the station located within the urban area of the capital city.
South Korea	7 cities	1992-2015	All causes. Provided by Korea Bureau of Statistics	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from weather stations located within the urban area managed by Korea Meteorological Administration.

COUNTRY	COUNTRY	PERIOD	MORTALITY DATA	TEMPERATURE DATA
Kuwait	1 city	2000-2016	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the National Center for Health Information, Ministry of Health, Kuwait.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements from the Directorate General of Civil Aviation (Kuwait Airport) and Kuwait's Environmental Public Authority.
Mexico	10 metropolitan areas	1998-2014	All causes. Provided by the National Institute of Statistics, Geography and Informatics.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements collected through the <i>Servicio Meteorológico Nacional</i> (SMN) and the <i>Instituto Nacional de Ecología y Cambio Climático</i> (INECC).
Moldova	4 cities	2001-2010	All causes. Provided by the National Centre for Health Management.	Mean daily temperature (in °C) computed as the average between daily minimum and maximum obtained from State Hydrometeorological Service, Moldova. A single weather station was selected for each city.
The Netherlands	5 regions	1995-2016	All causes. Provided by Statistics Netherlands.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from the Royal Dutch Meteorological Institute (KNMI).
Norway	1 city	1985-2016	All causes. Provided by the Norwegian Cause of Death registry.	Mean daily temperature (in °C) based on an observational modeled dataset from the Norwegian Meteorological Institute.
Panama	1 city	2013-2016	All causes. Provided by the <i>Instituto Nacional de Estadística y Censo, Centro de Información Estadística</i> .	Mean daily temperature (in °C) provided by the <i>Empresa de Transmisión Eléctrica, S.A. (ETESA)</i> . [Open Access]
Paraguay	1 city	2004-2016	All causes. Provided by the <i>Ministerio de Salud Pública y Bienestar Social, Dirección General de Información Estratégica en Salud, Subsistema de Información de Estadísticas Vitales</i> .	Mean daily temperature (in °C) obtained from the Global Historical Climatology Network (NOAA/WMO).
Peru	18 regions	2008-2014	All causes. Provided by the Peruvian Ministry of Health (MINSA).	Mean daily temperature (in °C) obtained from the National Meteorology and Hydrology Service of Peru (SENAMHI). One station per Region contributed data to each department series.
Philippines	4 cities	2006-2010	All causes. Provided by the Philippine Statistics Agency.	Mean daily temperature (in °C) computed as 24-hour average based on hourly measurements, obtained from National Oceanic and Atmospheric Administration (NOAA).
Portugal	2 cities	1985-2012	All causes. Provided by Statistics Portugal.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements collected from the National Oceanic and Atmospheric Administration (NOAA).
Puerto Rico	1 city	2009-2016	All causes. Provided by the <i>instituto de Estadísticas Vitales de Puerto Rico</i> .	Mean daily temperature (in °C) obtained from the Global Historical Climatology Network (NOAA/WMO).
Romania	8 cities	1994-2016	All causes. Provided by the Romanian National Institute of Statistics.	Mean daily temperature (in °C) obtained from stations operated by the National Meteorological Administration of Romania (NMA RO) ( <a href="https://www.ecad.eu/">https://www.ecad.eu/</a> )

COUNTRY	COUNTRY	PERIOD	MORTALITY DATA	TEMPERATURE DATA
South Africa	52 district municipalities	1997-2013	All causes. Provided by Statistics South Africa.	Mean daily temperature (in °C) computed as the average between daily minimum and maximum collected from the Agricultural Research Council of South Africa and the National Oceanic and Atmospheric Administration (NOAA).
Spain	52 cities	1990-2014	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the Spain National Institute of Statistics.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from weather stations of the Spain National Meteorology Agency. A single weather station, located within the urban area or at the near airport, was selected for each city.
Sweden	3 cities	1991-2016	All causes. Provided by the Swedish Cause of Death Register at the Swedish National Board of Health and Welfare.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements, obtained from the Environment and Health Administration.
Switzerland	7 cities and 1 metropolitan area (Lugano)	1995-2013	Non-external causes other than accidents (ICD-10 codes A00-R99, V01-V99, W00-X59). Provided from Federal Office of Statistics (Switzerland).	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from the IDAWEB database (a service provided by MeteoSwiss, the Swiss Federal Office of Meteorology and Climatology). A single weather station located within or near the urban area was selected for each city.
Thailand	62 regions	1999-2008	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the Ministry of Public Health, Thailand.	Mean daily temperature (in °C) computed as the average between daily minimum and maximum obtained from the Meteorological Department, Ministry of Information and Communication Technology, Thailand.
Taiwan	3 cities	1994-2014	All causes. Provided by the Department of Health, Taiwan.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements provided by air quality monitoring stations by the Taiwan Environmental Protection Agency.
UK	10 regions	1990-2012	All causes. Provided by the Office of National Statistics.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements from UKCP09 5kmx5km product.
Uruguay	1 city	2012-2016	Non-external causes (ICD-9: 0-799; ICD-10: A00-R99). Provided by the <i>Ministerio de Salud Publica</i> (MSP).	Mean daily temperature (in °C) provided by the <i>Instituto Uruguayo de Meteorología</i> (INUMET)
USA	211 cities	1985-2006	All causes. Provided by XXX.	Mean daily temperature (in °C) computed as the 24-hour average based on hourly measurements obtained from the National Climatic Data Center (NCDC) of the National Oceanic and Atmospheric Administration (NOAA).
Vietnam	2 cities	2009-2013	All causes. Provided by the Provincial Department of Health.	Mean daily temperature (in °C) computed from the 24-hour average of hourly measurements, obtained from National Oceanic and Atmospheric Administration's (NOAA) National Climate Data Center (NCDC). A single weather station was selected for each city.

**eTable 2.** Distribution of the minimum mortality temperature (MMT, °C) by country.

Country	Num. cities	Percentile distribution (MMT, °C)						
		Min.	p10	p25	p50	p75	p90	Max.
Argentina	3	23.1	23.1	23.1	24.7	25.0	25.0	25.0
Australia	3	21.8	21.8	21.8	22.9	23.9	23.9	23.9
Brazil	18	19.5	22.3	23.0	25.2	28.8	29.7	33.4
Canada	26	-33.5	1.9	17.3	19.5	21.1	22.7	24.8
Chile	4	7.7	7.7	12.1	17.3	18.1	18.2	18.2
