

BEC ftp service

We serve netCDF data by means of a secure ftp server. NetCDF files from which the maps were made (and other additional data) can be downloaded from sftp address `becftp.icm.csic.es` at port 27500. If your browser is sftp compatible you can browse directly from `sftp://becftp.icm.csic.es:27500` address. In order to download data you should be registered in our BEC ftp service. Registration is free, you can register just by filling the following form: <http://bec.icm.csic.es/bec-ftp-service-registration/>

If you need a dedicated ftp client (for instance FileZilla <https://filezilla-project.org/>) you should use the following configuration:

Host: `sftp://becftp.icm.csic.es`
username: your username
password: your password
Port: 27500
