

*Supplementary material*

**Figure S1.** Sapogenin content (g/100 g, n = 2) and extraction yield (%, n = 2) of extracts obtained at different molarities of HCl by microwave hydrolysis at 140°C for 30 min. Standard deviations are indicated by error bars. Mean values with different letters are significantly different ( $p \leq 0.05$ ).

**Figure S2.** Lipase inhibition (%, n = 2) and sapogenin content (g/100 g, n = 2) of extracts at 0.75 mg/mL obtained at different molarities of HCl by microwave hydrolysis at 140°C for 30 min. Standard deviations are indicated by error bars. Mean values with different letters are significantly different ( $p \leq 0.05$ ).

**Figure S3.** DDPH inhibition (%, n = 2) and sapogenin content (g/100 g, n=2) of extracts at 0.3 mg/mL obtained at different molarities of HCl by microwave hydrolysis at 140°C for 30 min. Standard deviations are indicated by error bars. Mean values with different letters are significantly different ( $p \leq 0.05$ ).

**Table S1.** Sapogenin profile of sapogenin-rich extracts produced from a commercial saponin-rich fenugreek extract under conventional hydrolysis (100 °C, 60 min) or microwave-assisted acid hydrolysis (MAAH, 30 min) at different temperatures (100, 120, 130 and 140 °C).

Sapogenin	Conventional Hydrolysis (100 °C, 60 min)	Microwave-Assisted Acid Hydrolysis (MAAH)				
		100 °C	120 °C	130 °C	140 °C	150 °C
