Recycled, chlorine-free paper was used to print this publication, in accordance with the environmental criteria applicable to public contracts.

Technical data: Format: 21.0 x 29.7 cm. Text body: 16 x 20,7 cm. Layout: one column. Typeface: Gill Sans Light 12. Binding: rustic and sewn with vegetable thread. Paper: Interior; semi-matte with "stucco" finish (couché), 125 g. Cover: 300 g poster board. Printed in four colours, plus machine varnish. Ink colours: 4 + 4 + varnish machine.

# Table of contents

<b>Authors .....</b>	<b>7</b>
<b>1. Introduction: the need for diversification in achieving sustainable aquaculture.....</b>	<b>9</b>
1.1. Aquaculture and diversification .....	10
1.2. Justification for writing this guide .....	12
1.3. Purpose of the guide.....	13
1.4. Organisation of the document.....	13
<b>2. Diversification of sites .....</b>	<b>15</b>
2.1. Introduction.....	15
2.2. Justification for selecting the site.....	15
2.3. Choice of sites. Geographical Information Systems .....	16
2.4. Case study: selection of the site for a marine farm for producing <i>Sparus aurata</i> (gilthead sea bream), <i>Dicentrarchus labrax</i> (sea bass) and <i>Argyrosomus regius</i> (meagre).....	19
2.5. Recommendation .....	22
<b>3. Diversification of the farmed species .....</b>	<b>25</b>
3.1. Background and justification .....	25
3.2. Diversification of the farmed species.....	25
3.3. Diversification process.....	26
3.4. New species.....	27
3.5. Integrated sole ( <i>Solea senegalensis</i> ) culture.....	29
3.5.1. Introduction .....	29
3.5.2. Reproduction.....	30
3.5.3. Larval culture.....	31
3.5.4. Fattening.....	31
3.6. Octopus ( <i>Octopus vulgaris</i> ) culture .....	31
3.7. Recommendations.....	33
<b>4. Diversification of culture density .....</b>	<b>35</b>
4.1. Background .....	35
4.2. Justification.....	36
4.3. Development.....	37
4.4. Conclusion.....	39
4.5. Case study. Production densities during the fattening phase in the ecological production of gilthead sea bream and sea bass in Mediterranean aquaculture facilities .....	39
4.6. Recommendations.....	43
<b>5. Diversification of the production systems .....</b>	<b>45</b>
5.1. Background .....	45
5.2. Production system types based on the saline tolerance of the species.....	45
5.3. Production system types based on the organism farmed.....	45
5.4. Production system types based on the development phases of the species .....	46
5.5. Production system types based on culture density.....	46

5.6. Production systems based on culture location.....	47
5.7. Types of facilities, based on the use of the water: open and closed circuits .....	48
5.7.1. Open circuit.....	48
5.7.2. Closed circuit.....	50
5.7.3. Relationship between production system and type of circuit.....	51
5.8. Case study: Closed circuit.....	51
5.8.1. Operation of the facility .....	52
5.8.2. Equipment and installations .....	53
5.9. Recommendations.....	53
<b>6. Diversification in the size of the facilities.....</b>	<b>55</b>
6.1. Introduction .....	55
6.2. Justification.....	55
6.3. Land-based facilities .....	56
6.4. Tideland facilities.....	56
6.5. Marine facilities .....	57
6.6. Case study: Aquaculture facility in Burriana (Castellón).....	59
6.7. Recommendations.....	60
<b>7. Diversification of the production cycle .....</b>	<b>63</b>
7.1. Introduction .....	63
7.2. Hatcheries and nurseries.....	64
7.2.1. Technical development.....	65
7.3. Fattening units .....	67
7.3.1. Land facilities .....	67
7.3.2. Farming in tidelands.....	68
7.3.3. Marine facilities.....	68
7.4. Integrated multi-trophic aquaculture (IMTA).....	70
7.4.1. IMTA systems .....	70
7.5. Recommendations.....	71
<b>8. Diversification and sustainability of aquaculture nutrition .....</b>	<b>73</b>
8.1. Introduction.....	73
8.2. Current problem with raw materials.....	73
8.3. Nutritional requirements of fish farmed in aquaculture.....	75
8.3.1. Protein.....	76
8.3.2. Lipids.....	76
8.3.3. Carbohydrates.....	76
8.3.4. Energy.....	77
8.3.5. Vitamins and minerals.....	77
8.4. Case study: Nutritional and environmental evaluation of a fall in protein levels in fattening feed for the gilthead sea bream ( <i>Sparus aurata</i> ) in a marine farm located in the Mediterranean Sea .....	78

8.5. Recommendations.....	79
<b>9. Diversification of products .....</b>	<b>81</b>
9.1. Background: diversification with respect to previous planning.....	81
9.2. Lengthening the life of the product.....	81
9.3. Processed and elaborated products.....	84
9.4. Brands (collective brands, guaranteed brands).....	86
9.5. Case study: the collective brand "Crianza del Mar".....	87
9.6. Recommendations.....	88
<b>10. Diversification of markets .....</b>	<b>91</b>
10.1. Introduction and background.....	91
10.2. Orientation to production as opposed to market orientation .....	91
10.3. Differentiation of products .....	92
10.4. Market segmentation.....	92
10.5. Diversification of geographical markets .....	93
10.6. Diversification based on types of market.....	94
10.7. Identification of targets.....	94
10.8. Trust in products for opening up new markets .....	95
10.9. Case study: Norway in action in the markets.....	95
10.10. Recommendations .....	96
<b>11. Appendixes .....</b>	<b>99</b>
11.1. Abbreviations.....	99
11.2. Bibliography .....	100
11.3. Information about the authors.....	107

## Authors

This Guide has been written by the Spanish Ministry of Environmental, Rural and Marine Affairs, with technical assistance provided by a Joint Venture formed by Tecnología y Medio Ambiente, S.A. (Tecnoma, S.A.) and Asociación Red de Innovación en Industrias Acuícolas (RIIA - CV).

The present Guide is a joint effort and was coordinated by Guido Schmidt and Francisco J. Espinós Gutiérrez, with the participation of the following experts:

Chapter	Expert(s)	Institution
Introduction	Francisco J. Espinós	Universidad Politécnica de Valencia –Asociación RIIA - CV
Diversification of sites	Francisco Ruiz Manuel Segarra	Universidad de Valencia / Valencia International University Universidad Politécnica de Valencia
Diversification of the farmed species	Evaristo Mañanos José Luis Muñoz Eduardo Soler Jerónimo Chirivella	CSIC – Torre la Sal IFAPA – El Toruño (Junta de Andalucía) Andromeda Group Universidad Católica de Valencia
Diversification of cultivation density	Clive Dove	Fundación INNOVAMAR
Diversification of production systems	Rodolfo Barrera Manuel Segarra	AVEMPI–Valenciana de Acuicultura s.a Universidad Politécnica de Valencia
Diversification in the size of the facilities	Tahiche Lacomba Sebastian Balasch	Andromeda Group Universidad Politécnica de Valencia
Diversification of the production cycle	Evaristo Mañanos Jerónimo Chirivella Francisco J. Espinós	CSIC – Torre la Sal Universidad Católica de Valencia Universidad Politécnica de Valencia –Asociación RIIA - CV
Diversification and sustainability in aquaculture nutrition	José Luis Tejedor	DIBAQ – DIPROTEG
Diversification of products	Jordi López José María Santiago Luis Ambrosio	ADS ACUIVAL Consultor PROBITEC S.L.
Diversification of markets	Javier Ojeda	APROMAR

We are also grateful for the cooperation of Fundación Observatorio Español de Acuicultura – Fundación OESA (Spanish Aquaculture Observatory Foundation) for taking part in the meetings with the experts, through its Managing Director Javier Remiro Perlado.

Summarised information about the authors is set out in Appendix 3.
